Summary

Computer Science Engineering student with hands-on experience in Generative AI, Retrieval-Augmented Generation (RAG), and AI-powered application development. Skilled in building intelligent systems using Llama3, ChromaDB, LangChain, LangGraph, and SentenceTransformers. Solved 400+ DSA problems on LeetCode and experienced in front-end development using React and Tailwind CSS.

Technical Skills

- **Programming:** Data Structures and Algorithms, OOPS, DBMS, Operating Systems
- **Languages:** Python, JavaScript, C++, HTML5, CSS3
- **Frameworks:** React.js, Tailwind CSS, Responsive Design
- **Technologies:** Ollama, ChromaDB, LangChain, LangGraph, Llama3, ChatGPT, Claude, GitHub Copilot
- **Skills:** Generative AI, RAG, Semantic Search, Prompt Engineering, Agentic AI, Vector Databases, LLM Integration, Git, GitHub, Transformers, Deep Learning

Experience

Google Cloud Generative AI Virtual Internship | EduSkills

Apr 2026 – Jun 2026

- Completed an 8-week AICTE EduSkills virtual internship focused on Generative AI and Large Language Models.
- Worked with concepts including Prompt Engineering, Embeddings, Multimodal RAG, Responsible AI, and AI Agents using Google Vertex AI.
- Explored transformer models, attention mechanisms, semantic search, and Generative AI application development.
- Performed weekly assessments, practical learning tasks, and final evaluation as part of the internship program.

Projects

DocuMind-AI | RAG PDF Chatbot | [GitHub](#)

- Built a Retrieval-Augmented Generation (RAG) chatbot using Llama3, ChromaDB, and SentenceTransformers for semantic question answering over PDF documents.
- Applied PDF parsing, chunking, embedding generation, vector similarity search, and context-aware response generation.
- Engineered a fully local AI pipeline using Ollama and vector databases for efficient document retrieval and conversational AI.
- Integrated semantic search techniques to retrieve highly relevant context for accurate AI-generated responses.

Local Llama3 CLI Chatbot | [GitHub](#)

- Built a terminal-based AI chatbot using Python and Ollama with conversational memory and response streaming.
- Executed role-based messaging, command handling, and interactive CLI features for real-time conversations.
- Designed dynamic system prompts and conversation history management for context-aware interactions.
- Enhanced user interaction by providing low-latency AI responses through local LLM inference without external APIs.

Portfolio Website | [GitHub](#)

- Built a responsive portfolio website using React and Tailwind CSS showcasing projects and technical skills.
- Created reusable UI components and optimized layouts for desktop and mobile devices.
- Improved overall user experience with responsive design and smooth navigation components.

AI Spend Audit Dashboard | [GitHub](#)

- Designed a responsive dashboard interface using React and JavaScript for analytics visualization.
- Built reusable UI components and optimized responsive layouts for improved user experience.
- Focused on clean UI design and efficient presentation of analytics-based data.
- Presented spending insights through intuitive visualizations, helping users better understand expense patterns and financial trends.

Achievements

- Solved **400+** problems on [LeetCode](#)
- Participated in [Coding Ninjas Summer Hackathon](#)
- Participated in [Gen AI Mastermind by Outskill](#)

Education

IMS Engineering College, AKTU

2023 – Present

B.Tech in Computer Science Engineering

Bhagirath Public School

2022 – 2023

Class XII – 73.8%
