Summary

Final-year Computer Science Engineering student specializing in frontend development with React.js, JavaScript, HTML, CSS, and Tailwind CSS. Experienced in building responsive web applications, reusable UI components, API integrations, and interactive user interfaces. Also experienced in integrating Generative AI and RAG capabilities into full-stack applications. Solved 400+ DSA problems on LeetCode.

Technical Skills

- **Languages:** JavaScript, Python, C++
- **Frontend:** React.js, HTML5, CSS3, Tailwind CSS, Responsive Web Design
- **Tools:** Git, GitHub, VS Code, Postman, Docker
- **Core Concepts:** Data Structures & Algorithms, Object-Oriented Programming (OOP), DBMS, REST APIs
- **AI:** LangChain, LangGraph, RAG, VectorDB, Ollama, GroqAI, Prompt Engineering

Projects

AXEL – AI Multi-Source Assistant | [GitHub](#)

- Built a full-stack AI assistant using **React.js**, **Tailwind CSS**, and **FastAPI**, with a responsive interface for interacting with multiple knowledge sources.
- Developed reusable React components for **chat**, **source management**, **file uploads**, **conversation history**, and **dynamic AI responses**, with seamless frontend-backend API integration.
- Integrated REST APIs with the frontend to process user queries and deliver **context-aware responses** from multiple knowledge sources.
- Implemented **RAG-based retrieval** using LangChain, ChromaDB, and Sentence Transformers across PDFs, YouTube videos, websites, GitHub repositories, folders, and images.
- Tested context-aware code analysis with **500–600+ lines of source code** and successfully processed **50+ page PDF documents** for retrieval and response generation.

Future Game Zone – SIH Team Project | [Live](#) | [GitHub](#)

- Worked as a Frontend Developer in a Smart India Hackathon team project.
- Developed responsive interfaces using **React.js** and **Tailwind CSS** with reusable UI components.
- Integrated APIs to fetch and display application data within interactive frontend workflows.
- Implemented responsive layouts for consistent usability across desktop and mobile devices.

AI Spend Audit Dashboard | [Live](#) | [GitHub](#)

- Developed a responsive analytics dashboard using **React.js** and JavaScript to visualize AI spending data.
- Built reusable React components for organizing and displaying analytics metrics.
- Integrated API-based data into interactive dashboard views.
- Implemented responsive layouts for consistent usage across desktop and mobile devices.

Achievements

- Completed [Google Cloud Generative AI Virtual Internship](#) (AICTE–EduSkills), gaining hands-on experience with Vertex AI, prompt engineering, and Generative AI applications.
- Participated in [Coding Ninjas Summer Hackathon](#)
- Participated in [Gen AI Mastermind by Outskill](#)

Education

IMS Engineering College, AKTU B.Tech in Computer Science Engineering	2023 – 2027
Bhagirath Public School Class XII – 73.8%	2022 – 2023
Bhagirath Public School Class X – 78%	2020 – 2021
